Lahore, Pakistan | talhanisar29959@hotmail.com

Portfolio: talha-gamedev.github.io | GitHub: github.com/talha-gamedev

LinkedIn: linkedin.com/in/muhammad-talha-784985150

Professional Summary

Unity and C# game developer with experience contributing to published mobile team projects, implementing simulation and gameplay features, integrating services and maintaining existing codebases. Work includes placement, persistence, business-simulation features and reconstruction of an unreleased action game. Seeking Senior Unity Game Developer roles.

Technical Skills

Unity 2D/3D; C#; object-oriented programming; gameplay mechanics; UI; save/load; physics-based simulation; debugging and optimization.

Firebase; AdMob; AppLovin; Google Play Services; Addressables; Play Asset Delivery; Web API integration; socket networking; Git; GitHub; Trello.

Professional Experience

Game Developer (Unity) | Smarnovative Labs

2022-Present | Lahore, Pakistan

- Contributed to published mobile games as part of the development team, implementing selected gameplay systems and production features.
- Contributed object placement, pool, gym, laundry and save/load functionality to Supermarket & Motel Simulator; worked on Google Play Services, Addressables and Play Asset Delivery.
- Contributed canteen and employee systems, open cinema and sphere cinema features to Cinema Movie Theatre Simulator, with related integration and support.
- Contributed bug fixing, optimization and selected modules to Bank Simulator Money Business during a junior-development stage.
- Added missions and related gameplay functionality to the Police Force project, currently listed as SWAT Force Police Car Chase 3D.

Muhammad Talha | Unity Game Developer

Selected Project Work

Citadel Slayer | Unreleased Professional Project

Reconstructed and completed core Unity systems after the original project source became unavailable. Created or expanded multiple enemy/villain archetypes and related gameplay functionality.

Dominoes Multiplayer | Completed but Unreleased

Completed inherited game logic, multiplayer functionality and UI. Release was discontinued following a business decision to prioritize offline titles and reduce recurring server infrastructure costs.

Ranch Farm Simulator | Personal Project and Unpublished

Built a farming project with catalog/inventory, animal production, crop progression and world persistence documented in a static source review. This is separate from the published Egg & Ranch Farming Simulator.

Janitor Simulator | In Development

Current project with implemented interaction, tool-action and task-progression modules identified in source analysis. Project ownership and individual module authorship [CONFIRM].

Education

BSCS | University of Central Punjab

2015-2019 | CGPA 3.38
