PROFESSIONAL SUMMARY

Unity game developer with published 2D and 3D mobile titles in simulation, puzzle and multiplayer genres. Combines independent game development with team production experience, including rebuilding gameplay systems and completing inherited projects.

PROFESSIONAL EXPERIENCE

Game Developer (Unity)

Smarnovative Labs | 2022-Present

Lahore, Pakistan

- Implemented placement, mission logic and business progression, with save/load support for persistent game state.
- Integrated Google Play Services and advertising/analytics SDKs; worked with Addressables and Play Asset Delivery.
- Investigated Android crashes with logcat and profiled performance on devices using Unity Profiler.
- Maintained a shared Unity codebase in Git, resolving scene and prefab conflicts and extending existing gameplay systems.

TECHNICAL SKILLS

Engine & language: C#, Unity 6, Unity 2021 LTS, URP, Built-in Render Pipeline.

Unity systems: ScriptableObjects, Input System, Cinemachine, AI Navigation, Animator controllers, animation events, physics, UI and Newtonsoft for save data.

Services: Firebase Analytics, AdMob, AppLovin, Unity IAP, Web APIs and sockets.

Development: Visual Studio; Unity Profiler on real devices; Android Studio/logcat for crashes; daily Git across a shared multi-title codebase, including scene and prefab merge conflicts.

Optimization: Object pooling, cached references, non-allocating physics queries, centralized updates, simpler shaders, reduced shadows and quality tiers.

PUBLISHED PROJECTS

Ludo Lush

Team project | 2D

Contributed gameplay features as part of the multiplayer Ludo development team.

Supermarket & Motel Simulator

Team project

Contributed placement, pool, gym, laundry and save/load features; worked with Google Play Services, Addressables and Play Asset Delivery.

Mall & Fast Food Simulator 3D

Team project

Shopping-mall management simulation featuring store expansion, retail operations and business upgrades.

Egg & Ranch Farming Simulator

Solo development

Farming simulation combining animal care, crops, egg production and ranch expansion.

Crime Scene Evidence Cleaner

Team project

Crime-scene cleanup simulation with evidence removal and story-driven cleaning tasks.

Cinema Movie Theatre Simulator

Team project

Contributed canteen and employee systems, open cinema and sphere cinema features to Cinema Movie Theatre Simulator.

Picture Puzzle Art Fun

Solo development | 2D

Art puzzle game built around arranging picture fragments to complete images.

Projects

PUBLISHED PROJECTS (CONTINUED)

Bank Simulator Money Business

Team project

Contributed bug fixes, optimizations and new modules to Bank Simulator Money Business.

SWAT Force Police Car Chase 3D

Team project

Added missions and related gameplay functionality.

Librarian Game Tidy Up Library

Solo development

Library organization game featuring book sorting, shelf collections and progression into additional library rooms.

Gun Shop Business Simulator 3D

Solo development

Shop-management simulation featuring inventory stocking, customer requests and store upgrades.

Garments & Cloth Factory Sim

Solo development

Clothing-business simulation combining garment production, inventory, shop management and factory growth.

Pipa Combate Kite Simulator 3D

Solo development

Kite-flying and combat simulation featuring flight controls, customization and kite-fighting challenges.

Power Washing Wash Simulator

Solo development

Pressure-washing simulation with surface-cleaning tasks, interchangeable nozzles and equipment upgrades.

Car Test Junkyard Racing Game

Solo development

Automotive simulation featuring vehicle repair, junkyard restoration, customization and driving challenges.

Cafe Simulator

Solo development

Implemented wall painting, save/load and gameplay systems for a cafe-management simulation.

FURTHER PROJECTS

Citadel Slayer

2D | Unreleased professional project

Reconstructed core Unity systems, including enemy archetypes and related gameplay functionality.

Dominoes Multiplayer

2D | Completed, unreleased professional project

Completed inherited game logic, multiplayer functionality and UI.

Ranch Farm Simulator

Solo development | Personal project, unpublished

Built inventory, farming progression and world persistence. Updated animal movement every frame while running decision logic less frequently.

Janitor Simulator

Solo development | In development

Cleaning-simulator project featuring tool interactions, cleaning actions, task progression and saved game progress.

ACADEMIC & C++ PROJECTS

Game of Life; Snakes & Ladders; Tic-Tac-Toe; Chess, including an AI version.

Academic research: Brain tumor detection using a deep convolutional neural network (DCNN).

EDUCATION

BS Computer Science

University of Central Punjab
2015-2019 | CGPA 3.38
